I hope this helps get things moved along and we hope to see more orders like this in the near future. The community deserves and actual plume size so hopefully we can get funds from the violator to do the research this would help all parties including PG&E at least to keep them somewhat honest.

Thanks, Daron Banks

HINKLEY RESIDENTS COMMENTS ON THE DRAFT CLEANUP AND ABATEMENT ORDER TO PACIFIC GAS AND
ELECTRIC COMPANY HINKLEY COMPRESSOR STATION, SAN BERNARDINO COUNTY

The following signatures are residents of Hinkley CA. by signing below we are agreeing and support the Cleanup and Abatement Order as written without changes issued July 25, 2012 with written comments to be received by 5:00 PM August 10, 2012. We are in agreement with the order to have more monitoring wells drilled to better define their currently undefined plume also to use domestic wells in order to define PG&E plume. The community would like to have even more monitoring wells than written in the cleanup and abatement order as needed to include the North, South, East and West outer areas in order to more define the extent of contamination. Also to include monitoring wells placed near domestic wells that have shown ND in the past and are now contaminated with PG&E chromium, chromium 6, manganese, uranium or possibly arsenic.
